Welcome to Year 3 (3D)

Our teacher this year is Mrs Natalie Davis.

This year is the first year the children will be aiming to reach the goals of Stage 2 outcomes in the curriculum. The will also participate in their first NAPLAN in May.

During term 1 Year 3 we have been learning about life cycles and one of our lifecycles is the caterpillar. Therefore in class we have collected caterpillars that were the Larvae of the Blue Triangle Butterfly. First we had to regularly take the caterpillars out of the jar and put them in to bug watchers so that we could have a close look at their characteristics. While this was happening we took the leaves out and cleaned the jar, then we went outside to collect new leaves as our caterpillars only like fresh leaves. After having them in our classroom for two weeks they all turned into chrysalises which was the first sign they were becoming butterflies. Sadly, three chrysalises died due to a parasite. However, the great news is our final chrysalis is turning from green to brown which tells us a butterfly is being formed inside. By Lachlan and Angus

I enjoyed writing about Similies, Nouns and adjectives during our literacy lessons. By Mia

I enjoyed learning how to do exit hooks in my writing because I would like to learn how to do running writing. By Molly

At school we have been learning about lifecycles in science and I found it very interesting. The most interesting one we learnt about was the lifecycle of the salmon. By Francis

We were looking after caterpillars that are about to turn into butterflies. By Leah

I really enjoy DEAR time because I love to read. By Mufaro
