Welcome to Year 6 (6Ro)

Our teacher is Miss Ashlee Rooney.

In Year 6Ro we have been investigating the Great Barrier Reef and the current threats endangering the Reef. We have enjoyed using the laptops to assist us with our research and have been extending our understanding through our Bloom’s Taxonomy Grid. We are about to begin our Science and Technology unit Earth and Space. Throughout this unit we will explore our solar system and the Aboriginal and Torres Strait Islander connections to the constellations. We will examine different geological events and how these impact on the Earth’s surface. In our Health unit we have been reflecting on our own personal power, and how we can effectively use our power. We have been working on developing a stronger resilience when facing challenging situations, in preparation for high school next year.
